## IDAK Career Match Program™

### Success Story

"When I realized that any serious undertaking that one's life, whether it's building a home, building a career, or building a financial portfolio, requires a deep understanding of all the elements that come into play, so why not consult an expert. When I realized I wanted to make a career change. I wanted it to be the last change, and a change into a career that was meaningful. I thought, 'I'm going to look for help in this.'"

*Vera Adamovich  
Imperial Financial  
Service*

*The IDAK Career Match Program™ is designed for adults seeking clarification about their aptitude strengths and specific corresponding career options. Completing this program will clearly identify WHERE you should be working (the organization) and WHAT you should be doing (the specific job title).*

The IDAK Career Match™ process is an in-depth evaluation and assessment of four main areas of your life...

1. Work Setting and Priorities
2. Inherent Natural Talents and Abilities
3. Enjoyable Experiences and Interests
4. Work Environment Values

When you complete this assessment you will gain clear insight and focus into the career that you are best suited for. Not only does George assess you one-on-one, but a computer is also used to evaluate the data and to match you with specific job titles from a pool of over 60,000 possibilities.

This process is designed to bring focus and clarity to your work life. To achieve this we will...

- Give you the IDAK testing tool and show you step-by-step how to complete it.
- Have an unlimited number of e-mail or phone interactions to offer you guidance and support while you complete the IDAK.
- Have a one-and-a-half hour clinical autobiographical consultation with George to assess you past enjoyable experiences.
- Have a one to two hour follow-up session to clearly explain your results, and to show you WHERE you should be working and WHAT you should be doing.
- Map out the next steps of your career transition.

*George Dutch is a  
Certified IDAK Career  
Counselor*
